**GYM**

Life has been extremely busy for Angelica lately. She is currently in school for a Bachelor's degree and she is working part-time for an aerospace company. She likes to start her mornings working out at the gym prior to attending classes in the morning. After working out, she has a limited amount of time until her first class and that is where she always runs into having trouble with finding a parking space on campus in a timely manner.
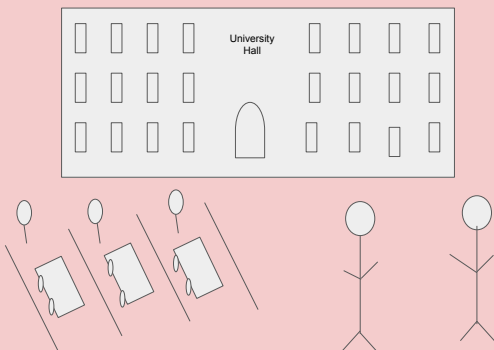

Angelica has a student parking pass however, spaces in the parking lots are limited. There are also a limited amount of parking lots available for her to park in. She attempts to park in the parking lot closest to her class building and of course it is full!
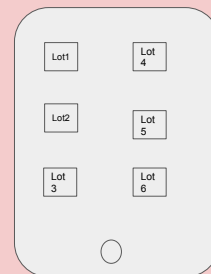

University Hall

Angelica sits in her car and wait for 5 minutes in the parking lot to see if anyone would leave. She was still unsuccessful at parking in the lot. Eventually, she ends up finding a metered parking spot in front of the building her class is located in. She has to hurry because class starts in 5 minutes.
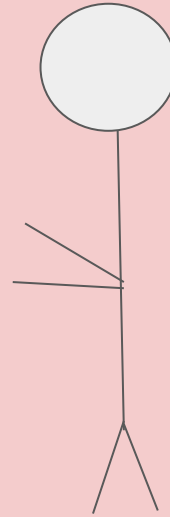

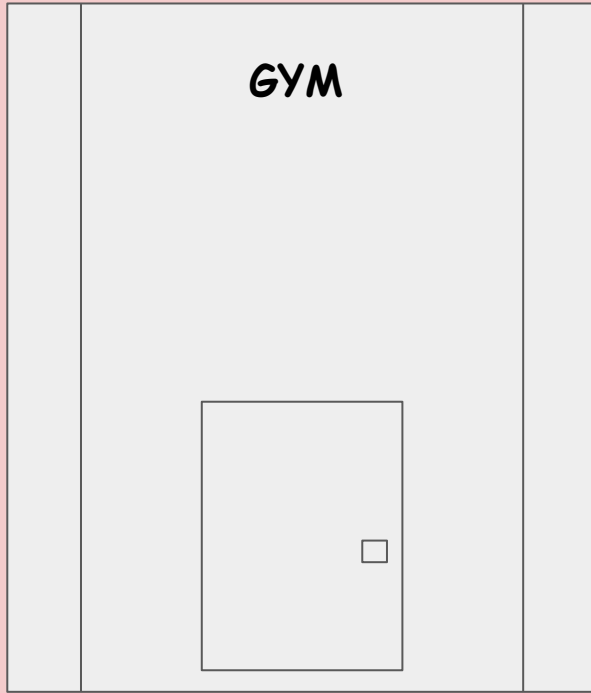

- Midterm today
- HW due Friday

She was able to make it to class on time and today is her mid term. Midway through the exam, she realized she forgot to pay for parking. The exam is timed and she is unable to go back outside to pay for parking. She decides to finish her exam and hopes she doesn't receive a parking citation.
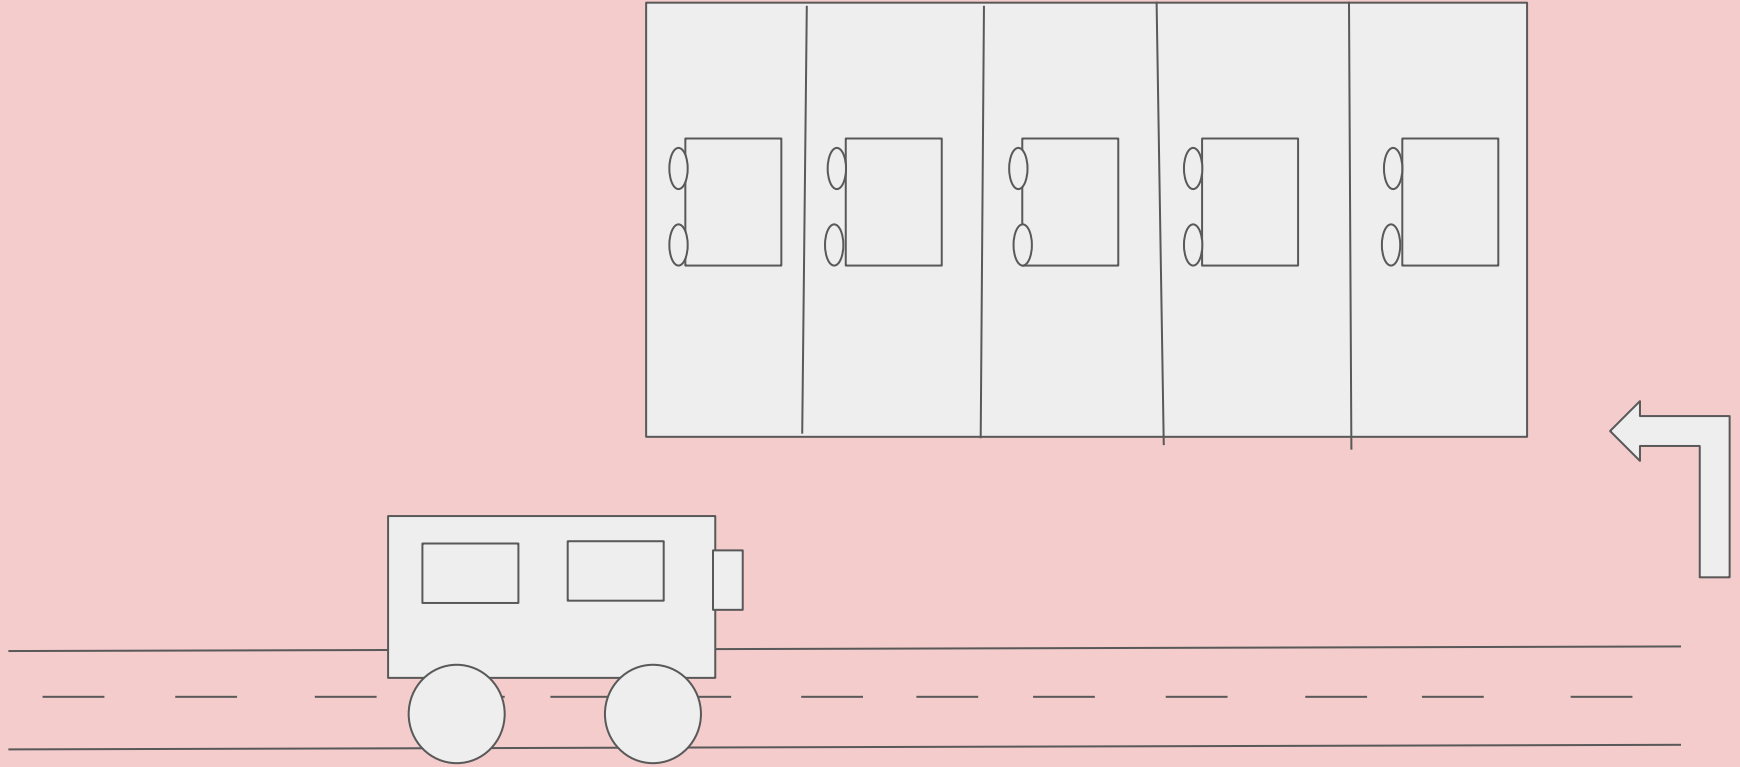

University Hall

After class she rushed out to her car and there wasn't a parking ticket. She ran into her friend Tim that informed her of an app he was making. The app would be useful to students needing to park on campus. He was in the process of going around surveying students and asking them how parking could improve on campus.
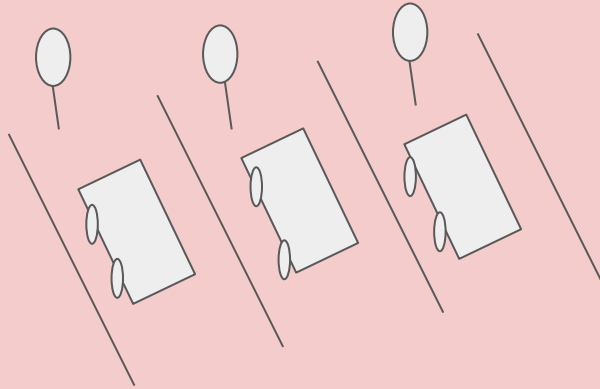

Lot1 Lot 4
Lot2 Lot 5
Lot 3 Lot 6

The app is scheduled to be released later this year and it will allow students to get real-time information on student parking lot capacity. This app will save students time and allow them to avoid driving to a full parking lot and finding available parking in lots that aren't at their full capacity.

Sammy CompSciNewbie by Bhanu Shekhawat

Sammy is frustrated because she cannot find parking. She decides to send her afternoon watching The Office, her favorite comfort TV show because she missed her class.

1

Sammy's friend suggests she downloads this app called Parking Finder.

2

Sammy is originally against the idea because she already has so many apps on her phone, and half of the apps help her manage her life. Unfortunately, her life is still not organized.

3

Sammy downloads the app, and realizes it helps find parking spaces. She realizes this is a great help, especially since she cannot always make the USC shuttle bus, or she wakes up late.

4

Sammy finally gets to her 8 am on time for the first time this whole semester.

5

Sammy is excited that she makes it to her 8am and is finally more interested in her Computer Science classes.

Slide 1

Tony Star   By: Heidi Duncan

When evaluating a time management plan Tony has realized how much time during the workday is being wasted on commuting to different job site locations because of traffic and parking.

1

Slide 2

Tony has closed in on the most problematic area

2

Slide 3

And it's surrounding the University of South Carolina campus.

3

Slide 4

Another meeting is held to decide if they want to approach the traffic or parking problem.

4

Slide 5

They choose parking as it can be more stable or predictable than traffic

5

Slide 6

Because of this, they choose the Parking App around the USC area to help cut down commute time.

Work Smarter Not Harder
Azariah Laulusa

Barb Wyer is leaving his tutoring session at Beech Middle at 10:30am feeling excited and carefree. It'll only take him no less than 30 minutes drive to his 11:40am class. He'll arrive early enough to relax and make it to class!

At least that's what he thought…

Barb arrived at the building where his classes will be at, but there are NO OPEN PARKING SPOTS!!!

Time flew by…
Barb was searching and searching and searching….
Until finally, his quest ended…

Barb paid for his meter, like a pro, and saw that it was 11:15am. He parked 15 minutes away from class! He's doesn't want to be late! He quickly "walked" to class…
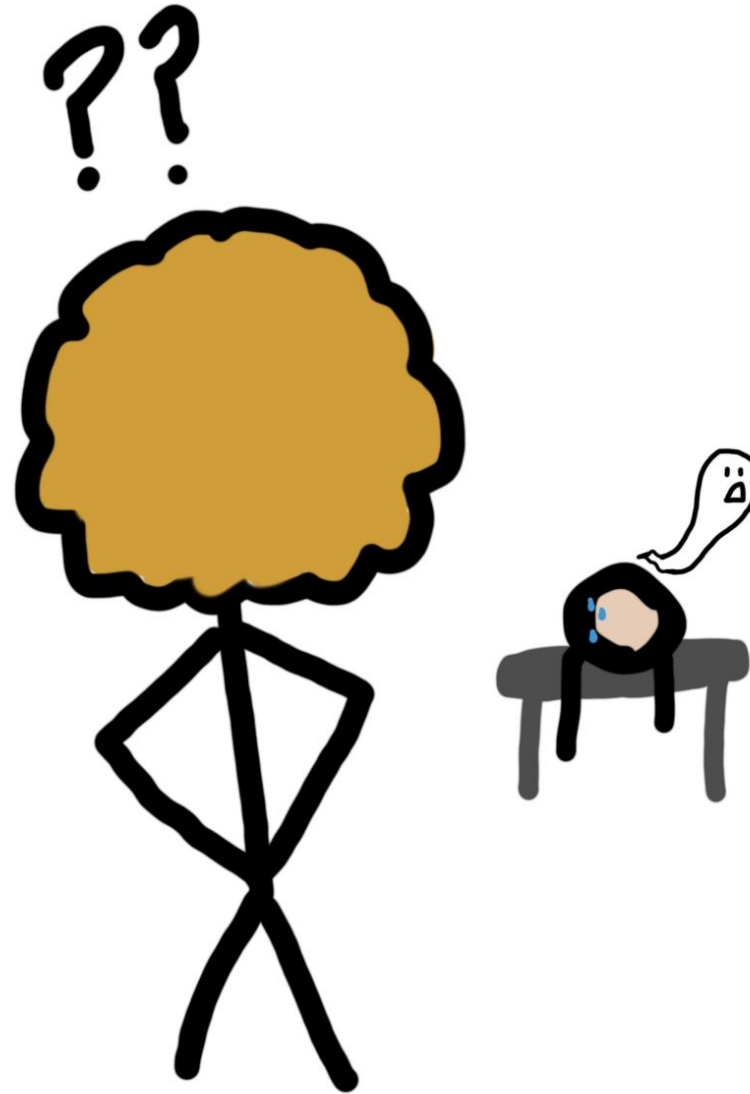

Barb made it to his class at 11:33am. He made it, but he was exhausted.

Barb's professor, Dr. Shirley U. Care, noticed that Barb looked tired, was having a hard time breathing, and was sweating profusely during her lecture. She came up to him after class and asked if he was okay.
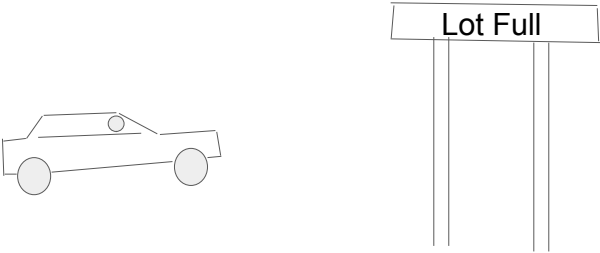

Barb explained to Dr. Care that he has been up since 6 o'clock and that he was stressing over finding a parking spot and making it to class on time. Dr. Care was happy to know Barb didn't have Corona. She said, "Barb work smarter not harder" and showed him the Parking Finder app.
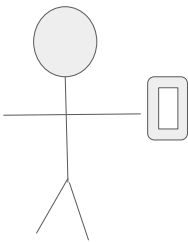

The next day, Barb decided to use the Parking Finder app. He loved it! Finding a parking near his class's building was faster and easier. Barb was also able to relax before class and that left him energized. He thanked Dr. Care and felt more prepared for the school year.
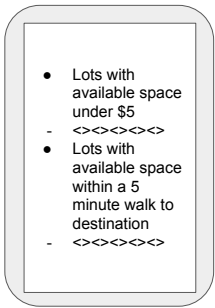

Ryan Reynoldo by Jimmy Dolson
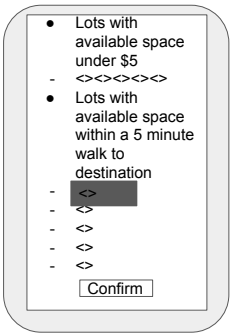

Lot Full

Ryan almost never makes it to set on time and he has finally narrowed down the reason why, the terrible parking situation at work.

Thankfully, Ryan has heard about a new app that can solve his big dilemma. The app is called the Parking Finder.
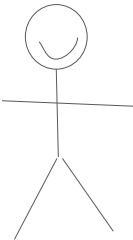

- Lots with available space under $5
  - <><><><>
- Lots with available space within a 5 minute walk to destination
  - <><><><>

Ryan uses the Parking Finder to determine what lots have spaces open to park in ahead of time.

- Lots with available space under $5
